PROFILE

B.Tech Information Technology student and founder of QIXARC. I turn ideas into software people actually use - across AI, SaaS products, automation and full-stack development. Currently focused on building scalable digital products and learning by shipping solutions to real-world problems.

EDUCATION

B.Tech - Information Technology

Expected 2028

Hindusthan Institute of Technology · CGPA 7.6 / 10

EXPERIENCE

Founder - QIXARC (Technology Startup)

2025 - Present

Leading product development, software architecture, business strategy and digital innovation. Building multiple software products in parallel: software & web development, web applications, AI solutions, SaaS products, database solutions and digital automation.

FEATURED PROJECTS

Scaler Profile - Micro SaaS

In development

WhatsApp & Instagram automation platform: leads, business messaging and workflow automation.

Serlow - AI Collaborative Workspace

In development

Unifies smart notes, visual docs, project management, GitHub and an interactive virtual office.

DecisionSphere - Strategic Analysis AI

Decision intelligence: structured reasoning, ripple-effect simulation, outcome prediction and data-driven recommendations with actionable implementation plans.

Zevaris AI - AI-Powered Platform

Coming soon

Intelligent automation, real-time insights and next-gen AI assistance with enterprise-grade security.

SKILLS

Programming: Python · Java · JavaScript · C

Web & Database: HTML · CSS · MySQL · Firebase

Tools: Git · GitHub · Vercel · Canva · Google AI Studio · Hostinger

Interests: AI · SaaS · Automation · Web Development · Startup Building · Product Design
